PROFILE STATEMENT

Computer Science graduate with a strong sense of ownership and a proven ability to learn and adapt quickly. Skilled in extracting optimal solutions through research and experimentation. Fluent in English, Bengali and Hindi. Known for a professional attitude, clear communication, and independent project execution. Passionate about building secure and intelligent systems that solve real-world problems.

EXPERIENCE

RenderLab

June 25 – Present

Back End Developer

Dhaka, Bangladesh

- **Backend Development:** Built and maintained RESTful APIs with Django, Laravel and Spring Boot, covering authentication, user accounts, payment gateway and core product features.
- **Data & Persistence:** Designed and refined relational schemas in PostgreSQL, SQLite, and used Firebase and MongoDB for document storage and real-time features such as chat and live updates.
- **Security & AI Features:** Implemented authentication, role-based access control, session management, rate limiting as well as ML-backed features such as RAG chat with pdfs into new and existing services.
- **Team Collaboration:** Collaborated with UI/UX and QA teams to ensure smooth development workflow.

Mongol Tori

Oct 22 – Dec 23

Research & Documentation

Dhaka, Bangladesh

- Worked on producing research for the main rover and documented it as well to produce a valid research
- Collected and analyzed performance data from rover sensors to improve autonomous navigation.
- Maintained versioned datasets and documented insights for the research team.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, Dart, Java
- **Frameworks:** Flutter, Flask, Django, SpringBoot, React, Bootstrap, Express, Next
- **Database Management:** SQL (SQLite, PostgreSQL, MySQL), NoSQL (Firebase, MongoDB), Query Optimization, Data Cleaning & Database Migration
- **AI & Data Tools:** Huggingface, Langchain, PyTorch, Scikit-learn, Pandas, Seaborn, Matplotlib
- **Other Tools:** Git, Docker, Postman, Linux, Virtual Machines, Arduino

EDUCATION

BRAC University

Jun 21 – Jan 13

Bachelor of Science in Computer Science

CGPA 3.05

Rajarbagh Police Line Uchcha Madyamic Bidyalaya

Jul 18 – Dec 20

Higher Secondary Certificate

GPA 5.00

PROJECTS

- **BloodAid:** Flask-based web app for managing blood donation posts and donor lists, with profile pages, campaign views and encrypted storage of sensitive user data in SQLite.
- **ScholarsHub:** Full-stack academic portal using React, Spring Boot and PostgreSQL, with secure auth, role-based pages, basic ML-backed features, PDF uploads and a chat that answers from stored documents.
- **UMate:** Cross-platform study companion built in Flutter and Firebase, offering friend lists, realtime chat, synced notes and simple schedule planning across mobile and desktop.
- **AniFlix:** Full-stack anime streaming site built with Django and JavaScript, with Google login, profiles, bookmarks, genre pages, event registration and a simple shop with cart and orders.
- **AnonChat:** A secure chat app built with react and firebase with anonymous accounts, realtime messaging and end-to-end encrypted conversations in the browser.

Research

- **Avantgarde: Host-based Intrusion Detection and Prevention Framework:** Designed and Developed a ML-driven host IDPS grounded in zero trust architecture, open-source IDS tools and automated response, evaluated on benchmark datasets and live network traffic.
- **Anomaly Detection in Network Traffic: Comparative Study with Ensemble and Deep Models:** Compared tree-based ensembles and neural networks performance in the BCCC-CIC-IDS2017 dataset for network intrusion detection.
